## Starting System *START TIME*

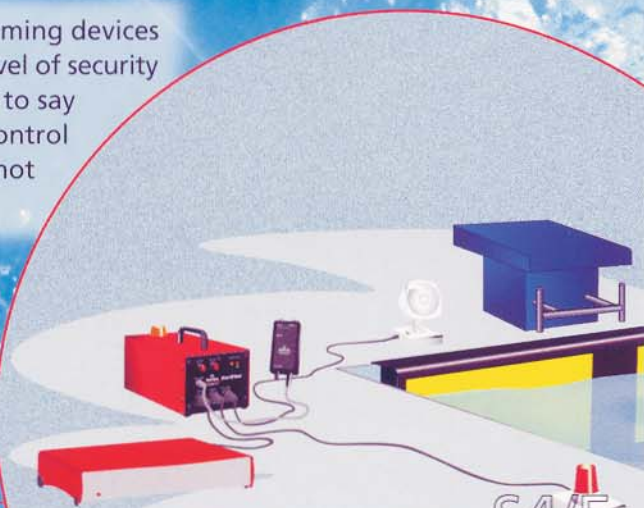

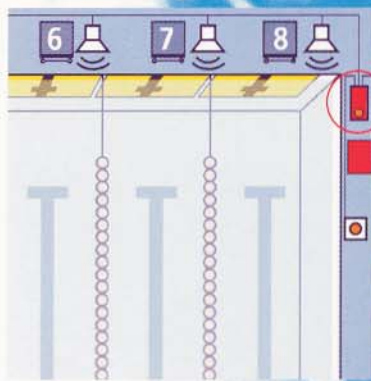

If you want the best, buy an Omega Electronics product.

The StartTime is the latest edition of the Omega Electronics acoustic start systems. You will find the StartTime compact and reliable as both the flash and the loudspeaker are integrated in the same case. It is important to position the StartTime so that deaf athletes see the flash. An additional external flash can also be connected to the StartTime where it is most necessary. The SPEAKER output enables one to connect a chain of loudspeakers therefore giving the start signal as close as possible to each athlete. The sound of the start signal must be brought as close as possible to the athlete in order to eliminate delay due to the comparatively slow propagation of sound.

The microphone unit enables one to give the start signal and also amplifies verbal commands; the TALK button connects/disconnects the internal microphone. The volume of verbal commands can be controlled on the main device. Two luminous indicators show the status of the system: "device switched on" and a "READY" indication which is controlled from the timing device.

The system, when connected to timing devices such as the ARES 21, give a high level of security with the READY indicator. That is to say it may be deactivated from the Control Room if the Timing Technician is not ready to accept a start signal.

S4/E

# TECHNICAL CHARACTERISTICS

# START TIME

Article number	2850-737
Alarm "low battery"	Yes
Autonomy of batteries	thousands of Starts
CE	meets the $\text{CE}$ standard specifications
Dimensions	400 x 200 x 160 mm
Weight	8.580 kg with charger and microphone
Microphone cable	10 m
Protection IP	IP41
Storage temperature	-20°C to +65°C
Working temperature	-10°C to +65°C
Relative humidity	(20% - 80%) without condensation
Operating manual	2850-540-02

## OPTIONS

- **Auxiliary flash**  
2850-710  
Optical signalling device for the start. Connected directly to the StartTime, it can be positioned to one's liking near the deaf athlete

- **External loudspeaker**  
2850-712  
16Ohms, 40W  
For mobile installations. To be positioned near each starting block so that all swimmers hear the start simultaneously.

- **Harness for loudspeakers**  
2850-616  
Harness cable used to link the StartTime to the loudspeakers. Harness cables:  
Art. 2850-617 4 loudspeakers  
Art. 2850-717 2 loudspeakers
